

IoENERGY COVID-19 BUILDING READINESS AND RETURN TO WORK SOLUTIONS

TURNKEY SOLUTIONS FOR COMMERCIAL BUILDINGS

Protecting Employee Health and Peace of Mind

RETURN TO WORK

UV DISINFECTION

Use the proven effectiveness of mobile and/or permanent broad-spectrum UV light modules to rapidly disinfect the spaces where people gather. Perfect for high-risk areas like building entrances, food prep stations, elevators, open floorwork spaces, etc.

TEMPERATURE CHECK STATION AND PPE MASK COMPLIANCE SYSTEMS

Site-entry temperature screening and mask compliance use proven AI technology and state-of-the-art IR and FLIR skin temperature sensor and data recording.

REMOTE ADMINISTRATION

24/7/365 remote monitoring and instant notifications from more than 80 sensor types alert the right people about issues related to occupancy, humidity, temperature, air quality, and more. You own your data with a wide range of storage options from hosted cloud service to on-premise data collection and alerting.

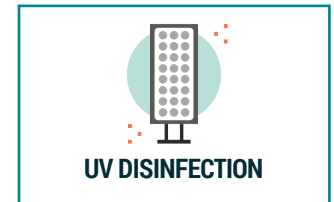

RETURN TO WORK/ENERGY SAVING

ENTERPRISE DATA AND ENERGY SYSTEMS FOR COMMERCIAL BUILDINGS

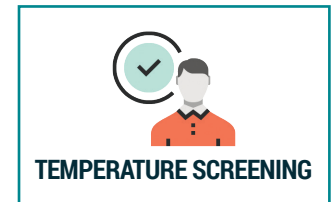

A building-wide IoT sensor network installed as a retrofit or as part of an LED lighting upgrade enables occupancy heatmaps showing high traffic areas and assists in space planning, signage placement, janitorial instruction, and auditing. Person tracking and geofence alarms can provide alerts and real-time location and contact tracing.

ENTERPRISE DATA, MONITORING AND ENERGY SYSTEMS FOR INDUSTRIAL SPACES

All of the energy and security benefits of advanced lighting control uniquely suited for warehouses, factories and other industrial sites. "On-demand," rather than "all-the-time" energy use dramatically reduces waste and saves money. Sensor-backed, remote alerts reduce the need for onsite inspections, while extendable sensor networks deliver real-time mission-critical information on numerous building systems.

IoENERGY EFFICIENCY UPGRADES PROVIDE COST BENEFITS THAT ARE IMMEDIATE AND ONGOING

ROI OFFSETS CAN HELP PAY FOR THE COSTS OF COVID-19 SPECIFIC UPGRADES

STRUCTURED FINANCING GENERATES AN ONGOING REVENUE STREAM THAT CAN FUND FUTURE IMPROVEMENTS:

IoENERGY – DEDICATED TO PROVIDING CUSTOMIZED, TURNKEY BUILDING READINESS SOLUTIONS

EXPERIENCE

1 Billion+ Installed Square Feet in Virtually Every Space Type, Work Environment and Industry.

ESSENTIAL WORKER DESIGNATION

Working Non-Stop Throughout the Shelter-in-Place Mandates in Every Market – Legally, Safely, Effectively.

VALUE

Manufacturer Direct, High-Volume Procurement Model Results in Highly Competitive Turnkey Project Pricing.

TECHNOLOGY AND VENDOR AGOSTIC

Customized Plans Designed to Meet YOUR Needs, Using Equipment Best Suited to YOUR Application.

ZERO CAPITAL EXPENDITURES

Expert Financial Utility Rebate & Incentive Identification & Management, Structured Off-Balance Sheet Term Agreements.

IoEnergy is a Value-Added Reseller for the Following Solutions Providers:
