

IoENERGY COVID-19 BUILDING SAFETY AND RETURN TO WORK SOLUTIONS

UV-C AIR SANITATION FOR CLEANER CIRCULATED AIR

Protecting Employee Health and Peace of Mind

As Covid-19 continues to wreak havoc on public health, disrupt the economy, and halt everyday life as we know it, building owners need to retrofit and upgrade their customer spaces and work areas to reduce the possibility of spreading illness.

MOBILE & PERMANENT UV-C AIR PURIFICATION

UV-C AIR SANITATION FOR HVAC SYSTEMS CAN CLEAN INDOOR AIR OF VIRUSES AND BACTERIA

Germicidal UV-C lighting installed within HVAC systems is a method of air sanitation that has been used for decades to kill airborne microorganisms in sensitive areas including hospitals and labs. UV-C light works by disrupting virus DNA, making it impossible to replicate. In the proper doses, UV-C air purification has been proven to deactivate microbes containing tuberculosis, measles and SARS-CoV pathogens, an earlier variant of Covid-19. In addition, UV light sanitation has also been used for years as a basic measure to clean the coils in HVAC air handler units.

ROOM-BY-ROOM LED GERMICIDAL AIR FLOW

Older buildings, buildings in cooler climates and smaller add-on structures often don't rely on HVAC airflow 24/7/365. That's why IoEnergy also provides building assessment and installation for the LumenFocus GAB Germicidal Air Flow Chamber. This air cleaner is designed specifically for the continuous disinfection of air in smaller spaces. This method safely positions microbe disabling UV-C lighting and a fan into a recessed chamber that is installed in the ceiling. The unit is completely safe for people and animals. LED Germicidal Air Flow Chambers are ideal for elevators, closets, out buildings, offices, classrooms, bars and restaurants.

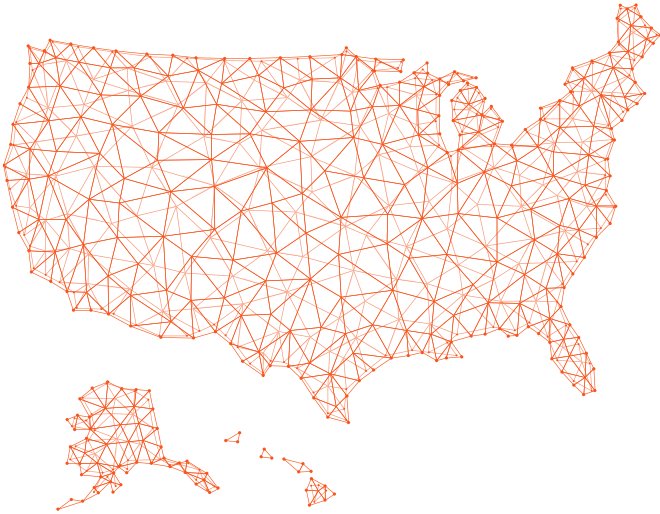

IoEnergy is nationally positioned and ready to help portfolio managers and large building owners implement building readiness solutions at scale, including UV-C HVAC sanitation lights and room by room germicidal air flow.

READY TO ASSIST NATIONWIDE

IoEnergy are experts in large scale HVAC retrofit and optimization. With a portfolio of clients across the United States, and years of industry experience, we have the capability and know-how to retrofit your building portfolio quickly, safely and effectively. Our teams of HVAC retrofit experts are positioned throughout the country for immediate deployment. No matter how large your portfolio footprint is, we can have your buildings circulating UV-C cleaned air quickly and efficiently.

Whether your system is single split, multi-split or VFR, IoEnergy is an experienced leader in commercial HVAC installation, and retrofit. Because we are a vendor agnostic service provider, we've worked with all the major brands and are ready to assess your building's UV-C requirements and tailor each solution to your specific use case.

DEDICATED TO PROVIDING CUSTOMIZED, TURNKEY BUILDING READINESS SOLUTIONS

YEARS OF EXPERIENCE

1 Billion+ Installed Square Feet in Virtually Every Space Type, Work Environment and Industry.

ESSENTIAL WORKER DESIGNATION

Working Non-Stop Throughout the Shelter-in-Place Mandates in Every Market – Legally, Safely, Effectively.

VALUE ADDED

Manufacturer Direct, High-Volume Procurement Model Results in Highly Competitive Turnkey Project Pricing.

TECHNOLOGY AND VENDOR AGOSTIC

Customized Plans Designed to Meet YOUR Needs, Using Equipment Best Suited to YOUR Application.

ZERO CAPITAL EXPENDITURES

Expert Financial Utility Rebate and Incentive Identification and Management, Structured Off-Balance Sheet Term Agreements.

Already open for business? In the planning phase? Looking for an implementation partner to help realize an existing building improvement plan? IoEnergy delivers building safety improvements quickly and effectively!
