

Electrical Vehicle Charging Station Solutions for Homeowner's Associations

A-Z EV Charging Station Implementation for HOAs and Other Master Planned Community Governing Bodies

Meet ESG Goals While Providing a Value-Added Service to Your Residents

As the focus on responsible investment continues to be a priority, real estate investment is increasingly being evaluated based on the commitment to meeting environmental, social and corporate governance standards.

- Installing EV charging stations is a visible demonstration to the ESG commitment.
- Residents benefit from this investment and will likely come to expect EV charging stations as a standard amenity in the future.
- On-site EV charging stations will help your community retain value and remain competitive.

Be Prepared for the Switch to Electric Vehicles, with Community Fast-Charging Solutions at Your Clubhouses, Parks and Shared Parking Lots

The switch to electric vehicles is underway and more EV charging options are needed to support this change. As electric vehicle ownership becomes standard, homeowners in HOA managed communities and master planned communities will soon expect fast charging solutions within their borders.

IoEnergy can help with planning, initial funding, and long-term funding including reserve study updates, in addition to installing the reliable, fast charging solutions you need to support your residents through this transition and maintain the value of your community. We are energy-efficiency experts with decades of experience in the planning and execution of large-scale electrical infrastructure projects.

Leverage Energy Efficiency Projects to Finance Charging Station Infrastructure

As energy efficiency architects, IoEnergy is uniquely positioned to help design a charging station plan that considers all aspects of your site's energy use profile.

- We will perform a comprehensive energy audit and determine whether there are efficiency opportunities that can offset the cost of charging station implementation.
- We will provide load calculations based on your existing systems and provide "good, better, best" options for delivering as many Level 2 charging stations as possible to help you meet the needs of your residents –today, tomorrow and five years from now.
- We will create implementation plans that make the most efficient use of space and result in minimal impact on the environment and the community.

The Time is Now—Federal, State and Utility-Backed Funding Won't Last Forever

Let IoEnergy track down and apply for all available funding opportunities. With years of experience as energy efficiency implementation partners, we know how to navigate the systems and paperwork to get every possible dollar for your project.
