

EV Charging & Electrification Solutions for the Warehouse & Distribution Sector

From Fork Lifts to Trucking Fleets, the Future is Electric

Meet ESG Goals While Providing a Value-Added Service to Your Team

As the focus on sustainable business practices becomes ever more important to shareholders, employees and customers, EV charging station installation is one more way your business can demonstrate its commitment to meeting its ESG goals.

- Fleet and equipment electrification is a visible demonstration to the ESG commitment.
- Reduce your carbon footprint and improve workplace air quality for your team.
- On-site EV charging as part of employee compensation packages can be used as a workplace incentive.

The switch to electric vehicles and equipment is underway, and California businesses are on the front lines of this infrastructure shift.

We Can Help You Electrify Your Entire Fleet, From Materials Handling to Trucking to Business Vehicles – It's Time to Make the Switch

Warehouse Electrification

IoEnergy can help with all aspects of a warehouse electrification upgrade including plug and circuit breaker updates, acid resistant flooring and spill kits, ventilation checks and modifications, battery maintenance education, and ADA compliance.

Distribution & Business Fleet Electrification

Fleet electrification typically includes infrastructure upgrades including electric truck refrigeration charging infrastructure, Level 2 and/or DC fast charging stations, facility-scale load balancing, etc.

Leverage Energy Efficiency Projects to Finance Charging Station Infrastructure

As energy efficiency architects, IoEnergy is uniquely positioned to help design a charging station plan that considers all aspects of your site's energy use profile.

- We will perform a comprehensive energy audit and determine whether there are efficiency opportunities that can offset the cost of fleet electrification.
- We will provide load calculations based on your existing systems and provide "good, better, best" options for designing electrification plans that will meet the needs of your facility today, tomorrow and five years from now.
- We will create implementation plans that make the most efficient use of space and result in minimal impact on the workplace environment.

The Time is Now—Federal, State and Utility-Backed Funding Won't Last Forever

Auditing and Identifying Bundled Efficiency Opportunities
Strategic Leveraging of On-Bill Financing & Energy Cost Savings to Offset Installation Costs
No-Cost-to-Client Rebate & Incentive Management
